Kind Attn: Sh. Ranvijay Pratap- Dy CME/CL

Dear Sir,

Ref: 2 Nos 5T EOT Crane ordered on us through Cofmow-OP-1703

Sub:- Introduction of 'Ready Chain System' for Cross Travel Motion

Kindly refer to the above, there is a Company named Igus, Bangalore, who have developed a "Ready Chain System" in place of Conventional festooning system for feeding power to the Trolley. Though this system is costlier by 25% than existing system but it is proven to be much better, maintenance free and at the same time aesthetically compact as it eliminates all hanging cables through moving trolley, suspended from girder.

As part of our Technological Development, the same system have been provided by us on a crane supplied to ICF Chennai, East Coast Rly, Vishwakapalanam (Through Cofmow, New Bellu)

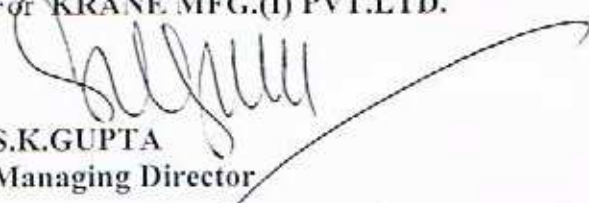

In case, you are interested, we can ask M/s. IGUS, Bangalore, the manufacturer of the system to contact you and explain the system for your approval.

As a very special case, we will not be charging any extra on this account.

Submitted for your further needful.

Thanking you and assuring you our best attention,

For KRANE MFG.(I) PVT.LTD.

  
S.K.GUPTA  
Managing Director
